## EXPERIENCE

### devMobile, Lagos — *web developer*

JUNE 2019 - PRESENT

- I was tasked with the design and development of an electronic roaster application for the ECOWAS commission
- Acted as the contact point between the technical team, functional team and the test teams
- Performed requirements analysis, design development, and test management of distinct versions of the roaster application.
- Estimated, performed feasibility analysis and forecast risks and planned delivery for new requirements
- Contributed to each project delivery phase (analysis, development, test, ops).
- Delivered new features in both agile and SDLC life cycles

### SQT Web Solutions, Abuja — *software engineer (lead)*

APRIL 2017 - FEBUARY 2019

- Engineered a rental application for tractors.
- Contributed to each project phase (analysis, development, test and ops)
- Implemented graphql for client apps to communicate with our solution.
- Designed and developed dashboards for farmers and tractor owners to track their progress using chartjs for charted views, and python for data analysis.
- On-site and remote troubleshooting, payment itegrations for clients.
- Contributed to several iterations in the agile development before the final version was published by the team.
